<b>Background</b>	nucleoside-triphosphatase, cancer-related(NTPCR) Homo sapiens The protein encoded by this gene is a non-specific nucleoside triphosphatase that is slow-acting in vitro. This gene is overexpressed in many tumor tissues, and while it is not essential for the cell, overexpression is cytotoxic. However, the cytotoxicity is not related to its triphosphatase activity. <b>Other</b>	NTPCR, Cancer-related nucleoside-triphosphatase
