Conjugation			
Background	POU class 2 homeobox 2(POU2F2) Homo sapiens The protein encoded by this gene is a homeobox-containing transcription factor of the POU domain family. The encoded protein binds the octamer sequence 5'-ATTTGCAT-3', a common transcription factor binding site in immunoglobulin gene promoters. Several transcript variants encoding different isoforms have been found for this gene. [provided by RefSeq, Oct 2011],		
Other	POU2F2, POU domain class 2 transcription factor 2
