Conjugation			
Background	<p>pituitary tumor-transforming 1 interacting protein(PTTG1IP) Homo sapiens</p> <p>This gene encodes a single-pass type I integral membrane protein, which binds to pituitary tumor-transforming 1 protein (PTTG1), and facilitates translocation of PTTG1 into the nucleus. Coexpression of this protein and PTTG1 induces transcriptional activation of basic fibroblast growth factor. Alternatively spliced transcript variants have been found for this gene. [provided by RefSeq, Nov 2013],</p>		
Other	PTTG1IP, Pituitary tumor-transforming gene 1 protein-interacting protein
