

phospho-MLKL (S358) mouse mAb(6F8) antibody

Catalog No :	Source:	Concentration :	Mol.Wt. (Da):
A19786	Mouse	1 mg/ml	
Applications	IF,IHC		
Reactivity	Human		
Dilution	IF: 1:50-200 IHC 1:100-200		
Storage	-20°C/1 year		
Specificity	phospho-MLKL (S358) protein detects endogenous levels of MLKL		
Source / Purification	The antibody was affinity-purified from mouse ascites by affinity-chromatography using specific immunogen.		
Immunogen	Synthetic Peptide of phospho-MLKL (S358)		
Uniprot No	Q8NB16		
Alternative names	MLKL		
Form	Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.		
Clonality	Monoclonal		
Isotype	IgG		
Conjugation			
Background	<p>mixed lineage kinase domain like(MLKL) Homo sapiens This gene belongs to the protein kinase superfamily. The encoded protein contains a protein kinase-like domain; however, is thought to be inactive because it lacks several residues required for activity. This protein plays a critical role in tumor necrosis factor (TNF)-induced necroptosis, a programmed cell death process, via interaction with receptor-interacting protein 3 (RIP3), which is a key signaling molecule in necroptosis pathway. Inhibitor studies and knockdown of this gene inhibited TNF-induced necrosis. High levels of this protein and RIP3 are associated with inflammatory bowel disease in children. Alternatively spliced transcript variants have been described for this gene. [provided by RefSeq, Sep 2015],</p>		
Other	MLKL, MLKL
