<b>Conjugation</b>			
<b>Background</b>	protein kinase, Y-linked, pseudogene(PRKY) Homo sapiens This gene is similar to the protein kinase, X-linked gene in the pseudoautosomal region of the X chromosome. The gene is classified as a transcribed pseudogene because it has lost a coding exon that results in all transcripts being candidates for nonsense-mediated decay (NMD) and unlikely to express a protein. Abnormal recombination between this gene and a related gene on chromosome X is a frequent cause of XX males and XY females. [provided by RefSeq, Jul 2010],		
<b>Other</b>	PRKY, Serine/threonine-protein kinase PRKY
