Background	scavenger receptor class A member 3(SCARA3) Homo sapiens This gene encodes a macrophage scavenger receptor-like protein. This protein has been shown to deplete reactive oxygen species, and thus play an important role in protecting cells from oxidative stress. The expression of this gene is induced by oxidative stress. Alternatively spliced transcript variants encoding distinct isoforms have been described. [provided by RefSeq, Jul 2008],
Other	SCARA3 CSR, Scavenger receptor class A member 3 (Cellular stress response gene protein)
