<b>Background</b>	C-type lectin domain family 11 member A(CLEC11A) Homo sapiens This gene encodes a member of the C-type lectin superfamily. The encoded protein is a secreted sulfated glycoprotein and functions as a growth factor for primitive hematopoietic progenitor cells. An alternative splice variant has been described but its biological nature has not been determined. [provided by RefSeq, Jul 2008],		
<b>Other</b>	CLEC11A, C-type lectin domain family 11 member A
