Conjugation	
Background	complement C3a receptor 1(C3AR1) Homo sapiens C3a is an anaphylatoxin released during activation of the complement system. The protein encoded by this gene is an orphan G protein-coupled receptor for C3a. Binding of C3a by the encoded receptor activates chemotaxis, granule enzyme release, superoxide anion production, and bacterial opsonization. [provided by RefSeq, May 2016],
Other	C3AR1, C3a anaphylatoxin chemotactic receptor
