Conjugation			
Background	calcium/calmodulin dependent protein kinase I(CAMK1) Homo sapiens Calcium/calmodulin-dependent protein kinase I is expressed in many tissues and is a component of a calmodulin-dependent protein kinase cascade. Calcium/calmodulin directly activates calcium/calmodulin-dependent protein kinase I by binding to the enzyme and indirectly promotes the phosphorylation and synergistic activation of the enzyme by calcium/calmodulin-dependent protein kinase I kinase. [provided by RefSeq, Jul 2008],		
Other	CAMK1, Calcium/calmodulin-dependent protein kinase type 1
