Conjugation	
Background	cell adhesion associated, oncogene regulated(CDON) Homo sapiens This gene encodes a cell surface receptor that is a member of the immunoglobulin superfamily. The encoded protein contains three fibronectin type III domains and five immunoglobulin-like C2-type domains. This protein is a member of a cell-surface receptor complex that mediates cell-cell interactions between muscle precursor cells and positively regulates myogenesis. [provided by RefSeq, Aug 2011],
Other	CDON, Cell adhesion molecule-related/down-regulated by oncogenes
