

Cystatin C mouse mAb(3B12) antibody

Catalog No :	Source:	Concentration :	Mol.Wt. (Da):
A13341	Mouse	1 mg/ml	

Applications	WB,ELISA
Reactivity	Human
Dilution	WB 1:1000-2000
Storage	-20°C/1 year
Specificity	Cystatin C protein detects endogenous levels of CST3
Source / Purification	The antibody was affinity-purified from mouse ascites by affinity-chromatography using specific immunogen.
Immunogen	Recombinant Protein of Cystatin C of CST3
Uniprot No	P01034
Alternative names	CST3
Form	Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.
Clonality	Monoclonal
Isotype	IgG
Conjugation	
Background	cystatin C(CST3) Homo sapiens The cystatin superfamily encompasses proteins that contain multiple cystatin-like sequences. Some of the members are active cysteine protease inhibitors, while others have lost or perhaps never acquired this inhibitory activity. There are three inhibitory families in the superfamily, including the type 1 cystatins (stefins), type 2 cystatins and the kininogens. The type 2 cystatin proteins are a class of cysteine proteinase inhibitors found in a variety of human fluids and secretions, where they appear to provide protective functions. The cystatin locus on chromosome 20 contains the majority of the type 2 cystatin genes and pseudogenes. This gene is located in the cystatin locus and encodes the most abundant extracellular inhibitor of cysteine proteases, which is found in high concentrations in biological fluids and is expressed in virtually all organs of the body. A mutation in this gene has been associate
Other	CST3, CST3
