Conjugation			
Background	nuclear factor, interleukin 3 regulated(NFIL3) Homo sapiens The protein encoded by this gene is a transcriptional regulator that binds as a homodimer to activating transcription factor (ATF) sites in many cellular and viral promoters. The encoded protein represses PER1 and PER2 expression and therefore plays a role in the regulation of circadian rhythm. Three transcript variants encoding the same protein have been found for this gene. [provided by RefSeq, Feb 2014],		
Other	NFIL3, Nuclear factor interleukin-3-regulated protein
