| <b>Background</b>            | follicular dendritic cell secreted protein(FDCSP) Homo sapiens This gene encodes a small secreted protein that is expressed in follicular dendritic cells. This protein specifically binds to activated B cells, and functions as a regulator of antibody responses. It is also thought to contribute to tumor metastases by promoting cancer cell migration and invasion. [provided by RefSeq, Dec 2011], |
| <b>Other</b>                 | FDCSP, Follicular dendritic cell secreted peptide  |
