<b>Background</b>	forkhead box E3(FOX E3) Homo sapiens This intronless gene belongs to the forkhead family of transcription factors, which is characterized by a distinct forkhead domain. The protein encoded functions as a lens-specific transcription factor and plays an important role in vertebrate lens formation. Mutations in this gene are associated with anterior segment mesenchymal dysgenesis and congenital primary aphakia. [provided by RefSeq, Dec 2009],
<b>Other</b>	FOX E3, Forkhead box protein E3
