Background	G protein-coupled receptor associated sorting protein 2(GPRASP2) Homo sapiens The protein encoded by this gene is a member of a family that regulates the activity of G protein-coupled receptors (GPCRs). The encoded protein has been shown to be capable of interacting with several GPCRs, including the M1 muscarinic acetylcholine receptor and the calcitonin receptor. Several transcript variants encoding the same protein have been found for this gene. [provided by RefSeq, May 2010],
Other	GPRASP2, G-protein coupled receptor-associated sorting protein 2 (GASP-2)
