Conjugation	
Background	adhesion G protein-coupled receptor G5(ADGRG5) Homo sapiens This gene encodes a member of the adhesion family of G-protein coupled receptors. Members of this family are characterized by long N-termini and multiple functional domains. They may play a role in the immune system as well as in the central nervous system. Alternative splicing results in multiple transcript variants. [provided by RefSeq, Jan 2016],
Other	GPR114, Probable G-protein coupled receptor 114
