Background	glutamate receptor interacting protein 1(GRIP1) Homo sapiens This gene encodes a member of the glutamate receptor interacting protein family. The encoded scaffold protein binds to and mediates the trafficking and membrane organization of a number of transmembrane proteins. Alternatively spliced transcript variants encoding different isoforms have been described. [provided by RefSeq, May 2010],		
Other	GRIP1, Glutamate receptor-interacting protein 1 (GRIP-1)
