Conjugation	
Background	golgi SNAP receptor complex member 1(GOSR1) Homo sapiens This gene encodes a trafficking membrane protein which transports proteins among the endoplasmic reticulum and the Golgi and between Golgi compartments. This protein is considered an essential component of the Golgi SNAP receptor (SNARE) complex. Alternatively spliced transcript variants encoding distinct isoforms have been found for this gene. [provided by RefSeq, Jul 2008],
Other	GOSR1, Golgi SNAP receptor complex member 1
