<b>Conjugation</b>	
<b>Background</b>	serine/threonine kinase 10(STK10) Homo sapiens This gene encodes a member of the Ste20 family of serine/threonine protein kinases, and is similar to several known polo-like kinase kinases. The protein can associate with and phosphorylate polo-like kinase 1, and overexpression of a kinase-dead version of the protein interferes with normal cell cycle progression. The kinase can also negatively regulate interleukin 2 expression in T-cells via the mitogen activated protein kinase kinase 1 pathway. [provided by RefSeq, Jul 2008],
<b>Other</b>	STK10, Serine/threonine-protein kinase 10
