| Background | microtubule associated serine/threonine kinase like(MASTL) Homo sapiens This gene encodes a microtubule-associated serine/threonine kinase. Mutations at this locus have been associated with autosomal dominant thrombocytopenia, also known as thrombocytopenia-2. Alternatively spliced transcript variants have been described for this locus. [provided by RefSeq, Feb 2010], |
| Other | MASTL, Serine/threonine-protein kinase greatwall |
