

MBL-C rabbit pAb antibody

Catalog No :	Source:	Concentration :	Mol.Wt. (Da):
A17378	Rabbit	1 mg/ml	26144

Applications	WB,ELISA
Reactivity	Human,Mouse
Dilution	WB 1:500-2000, ELISA 1:10000-20000
Storage	-20°C/1 year
Specificity	The antibody detects endogenous MBL-C protein
Source / Purification	The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen.
Immunogen	Synthetic peptide from human protein at AA range: 21-70
Uniprot No	P11226
Alternative names	MBL2 COLEC1 MBL
Form	Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.
Clonality	Polyclonal
Isotype	IgG
Conjugation	
Background	mannose binding lectin 2(MBL2) Homo sapiens This gene encodes the soluble mannose-binding lectin or mannose-binding protein found in serum. The protein encoded belongs to the collectin family and is an important element in the innate immune system. The protein recognizes mannose and N-acetylglucosamine on many microorganisms, and is capable of activating the classical complement pathway. Deficiencies of this gene have been associated with susceptibility to autoimmune and infectious diseases. [provided by RefSeq, Jul 2008],
Other	MBL2 COLEC1 MBL, mannose-binding lectin (protein C) 2, soluble (opsonic defect)
